What is Madrid Rio?

- Madrid Rio is a big park, where people go to hang out, it houses historical places and has a famous shopping center where it is a perfect place to meet teenagers.

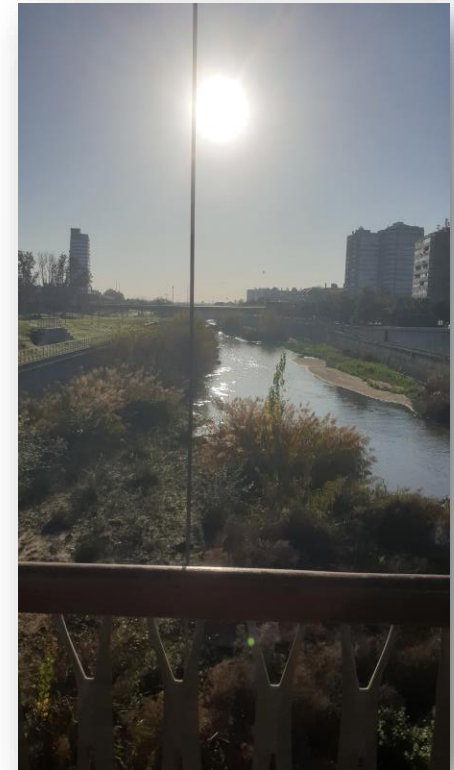

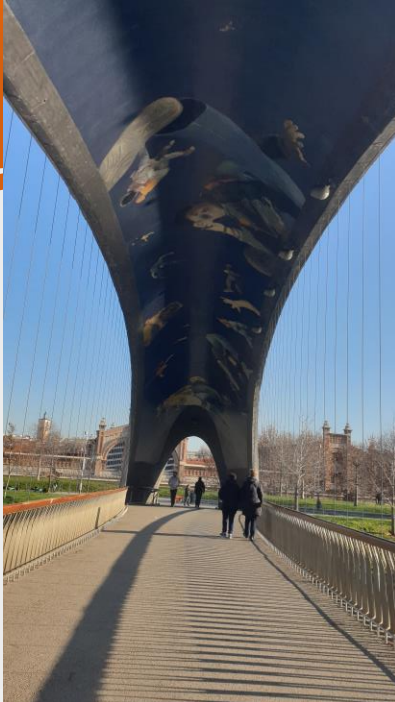

Shopping Center "Plaza Rio 2"

- It is one of the most popular shopping centers in the neighborhood. Located next to the Manzanares River, it is well located, being next to the park. They are connected by a small bridge for easy access.

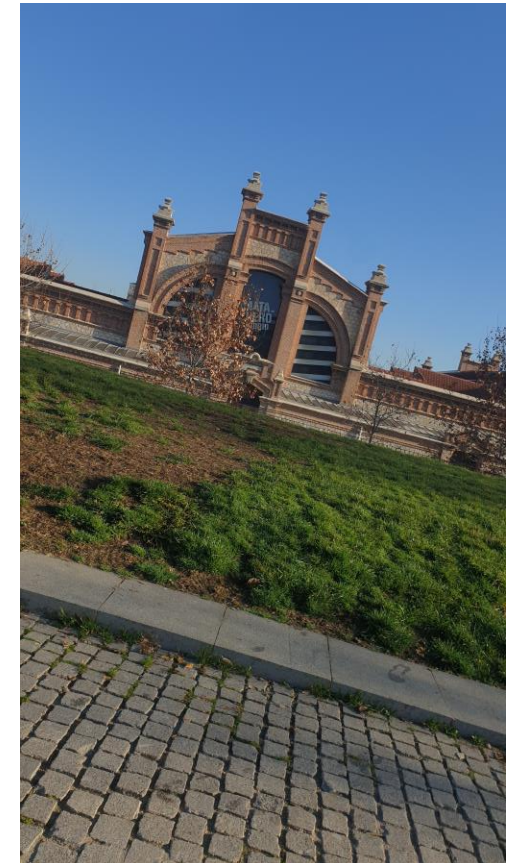

Manzanares River

- Manzanares River, is the most important river in Madrid, because it is the only one that passes through the capital. At the beginning of the 20th century, people went to wash clothes and bathe. This river had a lot of flow and fauna, but over the years and global warming, it caused the reduction of water in this river, plus the garbage that people throw away.

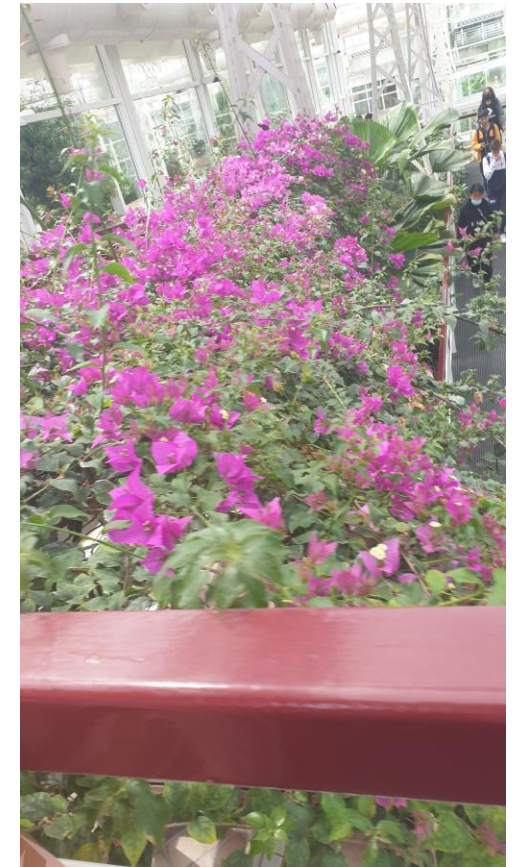

Matadero Madrid

- The Madrid slaughterhouse was the place where animals (pig, cow, lamb...) were taken to be killed and sold to butcher shops. But they closed the slaughter rooms, and now it is a place for visitors, exhibitions, and in winter they have a skating rink.

Palacio de Cristal Arganzuela

- They are greenhouses, where there are several rooms, where you can find plants of different species and climates. Inside there are high temperatures. They have many different species to which, all beautiful.

And this is all!!!!!!

- In this work we have talked a little about the largest park we have in the neighborhood. There is also a large and smooth area where people go to skate and practice or play.
