

UNESCO CULTURAL AMBASSADORS

Slovak student's reviews from mobility in Vilnius:

Ema:

At first, the Erasmus project meant getting out of my comfort zone for me. After all, going abroad to live with an unknown family is not that easy. Fortunately, my fears were not fulfilled. I really enjoyed the entire trip, I met lots of great people and made new wonderful friends not only from Lithuania, and especially I tested my communication skills in English. The individual trips were interesting, I got to know some parts of Lithuania and I really fell in love with some of them. It was a magical project that I will tell my grandchildren about.

Ester:

To sum up, for me, this project was a really amazing experience. I chose this country because I've never heard from other people to talk about and I had low expectations. But eventually, Lithuania was a really nice country, a little bit different from Slovakia. We visited some of the best known buildings and sights in the city and in the neighbourhood. I met a lot of great people, spent some time doing interesting activities and learned some new Lithuanian and Russian words. I left with enriching experiences and I will remember these times for a very long time.

Laura:

I can say that our exchange trip to Lithuania was one of the best things that I could experience. The whole programme they prepared for us was really good. I enjoyed every minute of it. I'm so glad that I had a chance to experience such a thing. I met a lot of great people, made a lot of friends and I'm happy to say that I'm in contact with most of them. If I could, I would like to experience this trip one more time.

Laura:

This was my first time visiting a country via Erasmus+ and, as I had expected before, I had the best time there. The people, the town, the programme, everything was amazing. The kids from other countries were very nice and I felt like we had known each other our whole lives, even though it was only a week. My host was really kind and likeable too and from the first moments we knew we're gonna stay friends. It felt like I found my twin in Vilnius. Speaking about Vilnius, this town stole my heart; the architecture and nature, people, parks, cafés,... it's really lively (and also lovely) city. I'm grateful I got to live in this town for a week and make only good memories. I'm also grateful that I tried several traditional Lithuanian meals but I think I still prefer the Slovakian ones (maybe because we don't put so much dill in every food!!).

Overall, I put my trust in this project and our hosts from Vilnius, and thanks to that I got to know many awesome people, I visited various beautiful places and I made some unforgettable memories in Lithuania.

Lívia:

Erasmus project in Lithuania was definitely one of the best experiences of my life. We discussed a great topic, visited some beautiful places and did interesting activities. I improved my communication skills in English. The best part about this project was meeting so many wonderful people from different countries. It was a very enriching experience and I am grateful that I could be a part of it!
